OBJECTIVE

Aspiring Data Science and Machine Learning Engineer with hands-on experience building end-to-end ML pipelines and deploying models via REST APIs. Proficient in Python, Scikit-learn, FastAPI, and SQL. Focused on predictive modeling, NLP, and ML deployment.

TECHNICAL SKILLS

Programming & Data: Python, SQL, Pandas, NumPy

Machine Learning: Scikit-learn, Feature Engineering, Model Evaluation, Cross-Validation, Hyperparameter Tuning

Data Analysis & Visualization: Exploratory Data Analysis (EDA), Matplotlib, Seaborn

Deployment & APIs: FastAPI, Docker, REST APIs

Tools & Databases: Git, GitHub, Jupyter Notebook, PostgreSQL

EXPERIENCE

Digital Egypt Pioneers Initiative (DEPI) | *Machine Learning Engineer Track* | 2026

- Completed end-to-end ML workflows, preprocessing, EDA, feature engineering, model training, evaluation, and cross-validation on real-world datasets using Python and Scikit-learn.
- Gained hands-on exposure to NLP, computer vision, Azure AI Services, and Hugging Face Transformers as part of the structured ML Engineer curriculum.
- Built and evaluated multiple ML models, applying hyperparameter tuning (GridSearchCV, RandomizedSearchCV) to improve model performance.

CIS Team | *AI & Data Science Member* | 2026

- Contributed to AI and Data Science projects within a structured team environment, focusing on data analysis, feature engineering, and predictive model development.
- Applied EDA and preprocessing pipelines to improve data quality, and collaborated on model evaluation and iteration cycles.
- Gained practical experience working with real-world datasets, translating raw data into actionable insights to support project goals.

National Telecommunication Institute (NTI) | *Artificial Intelligence Intern* | Jul 2026 – Aug 2026

- Trained in AI, Machine Learning, and Deep Learning through a government-sponsored program at a national institute.
- Applied Python, Pandas, and NumPy for data preprocessing, feature engineering, and exploratory data analysis on real datasets.
- Built and evaluated ML models end-to-end, applying cross-validation and standard metrics to compare performance across model types.

PROJECTS

House Rent Prediction | [GitHub](#)

Python · Pandas · NumPy · Scikit-learn · FastAPI

- Built an end-to-end ML pipeline predicting rental prices across 6 Indian cities; cleaned heavily noisy data with injected special characters, missing values, and inconsistent formatting.
- Compared 6 regression models via 5-fold cross-validation; tuned Random Forest with RandomizedSearchCV + GridSearchCV — achieved $R^2 = 0.69$, $MAE \approx ₹13,200$ on the test set.
- Deployed a FastAPI REST backend (POST /predict) with an HTML/CSS/JS frontend served at the same origin.

User Behavior Analysis & Purchase Prediction | [GitHub](#)

Python · Scikit-learn · FastAPI · Pandas

- Built an end-to-end ML app predicting e-commerce purchase intent, from data ingestion and feature engineering to a live FastAPI backend with an interactive frontend.
- Resolved critical overfitting, reducing the train/test accuracy gap by 10+ percentage points via regularization and cross-validation tuning.
- Organized the codebase into modular preprocessing, training, and inference pipelines for clean structure and easy retraining.

EDUCATION

Bachelor of Computer Science | Software Engineering

Faculty of Computers and Information, Mansoura University | Expected Graduation: 2028

CERTIFICATIONS

- Machine Learning Specialization, Andrew Ng, Coursera
- Mathematics for Machine Learning, Imperial College London, Coursera
- Digital Egypt Pioneers Initiative (DEPI), ML Engineer Track (NLP, Computer Vision, Azure AI, Hugging Face)
